PROFILE

Singapore Polytechnic graduate in Media, Arts & Design (Game Design) with project experience in business-process automation, web tools, and game logic. Builds with C#, JavaScript, HTML/CSS, SQL, and Luau. Approaches debugging through careful logic tracing and uses AI-assisted prototyping as a complement to manual verification.

TECHNICAL SKILLS

Programming	C#, JavaScript, SQL, Luau, HTML, CSS
Platforms	Unity, Google Apps Script, Web APIs
Tools	Git, GitHub, Visual Studio, VS Code
Practices	Process automation, prototyping, debugging, logic tracing

SELECTED PROJECTS

Cogsworth's Forge

School project

Unity 6 · C# · Meta Quest VR · OpenXR

- Built a steampunk VR prototype and explored Meta Quest development for the first time, configuring Unity's XR tools and input for an immersive experience.

Hardwood Hustle: The $25 GM

In progress

React · Framer Motion · Vite · NBA draft simulation

- Building a mobile-first local couch draft game for 2–8 GMs, with timed NBA player auctions, configurable budgets, and modern or all-time player pools.
- Implemented two roster challenges: an eight-attribute player build and a five-player franchise draft with position-fit and synergy scoring.

EXPERIENCE

Business Process Automation Intern

Internship

Google Apps Script · JavaScript · HTML/CSS · Google Workspace APIs

- Developed an internal web tool to automate recurring form workflows and integrate Google Workspace services.
- Added validation and cleanup tools to reduce repetitive handling and support consistent data management.

Full-Time National Serviceman — Assistant Storeman
