## PROFILE

Singapore Polytechnic graduate in Media, Arts & Design (Game Design) with project experience in business-process automation, web tools, and game logic. Builds with C#, JavaScript, HTML/CSS, SQL, and Luau.

I Approach debugging through careful logic tracing and use AI-assisted prototyping as a complement to manual verification and creation.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming** | C#, JavaScript, SQL, Luau, HTML, CSS |
| **Platforms** | Unity, Google Apps Script, Web APIs |
| **Tools** | Git, GitHub, Visual Studio, VS Code |
| **Practices** | Process automation, prototyping, debugging, logic tracing |

## SELECTED PROJECTS

### Cogsworth's Forge

School project

Unity 6 · C# · Meta Quest VR · OpenXR

- Built a steampunk VR prototype and explored Meta Quest development for the first time, configuring Unity's XR tools and input for an immersive experience.

### Hardwood Hustle: The $25 GM

Personal Project

React · Framer Motion · Vite · NBA draft simulation

- Building a mobile-first local couch draft game for 2–8 GMs, with timed NBA player auctions, configurable budgets, and modern or all-time player pools to create the most engaging experience.
- Implemented two roster challenges: an eight-attribute player build and a five-player franchise draft with position-fit and synergy scoring systems.

## EXPERIENCE

### Business Process Automation Intern

Mar 2025 – Aug 2025

Triggered Games · Google Apps Script · JavaScript · HTML/CSS · Google Workspace APIs

- Developed an internal web tool to automate recurring form workflows and integrate Google Workspace services.
- Added validation and cleanup tools to reduce repetitive handling and support consistent data management.

### Full-Time National Serviceman — Supply Assistant

Present

Singapore

## EDUCATION

### Diploma in Media, Arts & Design (Game Design)

Graduated April 2026
